

Aluplast HST 85

Kunststof hefschuifpui, 197 mm bouwdiepte

Kaderprofiel — bouwdiepte 197 mm

Vleugelprofiel — aanzicht 110 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Uf	1.10 W/m²K
Frame depth	197 mm
Shape	vlak
Maximum size	6,500 × 2,700 mm
