

Aluprof MB-59HS

Aluminium hefschuifpui, instapmodel

Kaderprofiel — bouwdiepte 59 mm

Vleugelprofiel — aanzicht 152 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	aluminium
Uf	1.80 W/m²K
Frame depth	59 mm
