

Aluprof MB-77HS

Aluminium hefschuifpui, zwaarder kader

Kaderprofiel — bouwdiepte 77 mm

Vleugelprofiel — aanzicht 188 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	aluminium
Uf	1.80 W/m²K
Frame depth	77 mm
Outer frame width	73 mm
Sightline	188.5 mm
Shape	vlak

Maximum size	6,500 × 3,000 mm
Maximum sash width	2,200 mm
Size tolerance	±2 mm up to 1 m, ±3 mm above that
