

Aluprof MB-86N

Slanke aanzichten, elke RAL

Kaderprofiel — bouwdiepte 77 mm

Vleugelprofiel — aanzicht 122 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	aluminium
Uf	0.57 W/m²K
Frame depth	77 mm
