

Aluprof MB-Ferroline

Steellook, zeer slanke profielen

Kaderprofiel — bouwdiepte 110 mm

Vleugelprofiel — aanzicht 97 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	aluminium
Uf	1.50 W/m²K
Frame depth	110 mm
