

Gealan S 9000 Base

15° schuinite, dieptewerking

Kaderprofiel — bouwdiepte 120 mm

Vleugelprofiel — aanzicht 119 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Uf	1.10 W/m²K
Frame depth	120 mm
