Kunststof hefschuifpui

Kaderprofiel — bouwdiepte 179 mm

Vleugelprofiel — aanzicht 110 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Frame depth	179 mm
Shape	vlak
Maximum size	6,500 × 2,700 mm
Maximum sash width	2,000 mm
