

K-vision Trend

Verdiept, terugliggend draaideel

Kaderprofiel — bouwdiepte 120 mm

Vleugelprofiel — aanzicht 130 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Uf	1.20 W/m²K
Frame depth	120 mm
Outer frame width	81 mm
Sightline	130 mm
Shape	verdiept
Maximum size	3,500 × 2,600 mm
Maximum sash width	1,300 mm
Size tolerance	±2 mm up to 1 m, ±3 mm above that
