

Rehau Geneo

Kunststof zeskamerprofiel, 86 mm bouwdiepte; glas tot 53 mm

Kaderprofiel — bouwdiepte 86 mm

Vleugelprofiel — aanzicht 99 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Uf	0.86 W/m²K
Frame depth	86 mm
Sightline	99 mm
Maximum sash width	1,600 mm
Size tolerance	±2 mm up to 1 m, ±3 mm above that
