

Rehau Synego

Kunststof raam- en balkondeursysteem, 80 mm bouwdiepte; glas tot 51 mm

Kaderprofiel — bouwdiepte 80 mm

Vleugelprofiel — aanzicht 117 mm

This is a schematic cross-section, built from the measured frame depth, frame width and sightline. The chamber layout, seals and reinforcement are not measured — they come from the supplier's technical drawing.

Specifications

Material	kunststof
Uf	0.94 W/m²K
Frame depth	80 mm
Sightline	117 mm
Maximum sash width	1,600 mm
Size tolerance	±2 mm up to 1 m, ±3 mm above that
